

Bernell now sells Nordic Naturals®

More and more optometrists are selling Omega 3 to their patients. Studies show that Omega 3 is as much as 4X as effective as Flaxseed for dry eyes. Now studies show reversal of some vision loss with dry ARMD by the use of Omega 3.

Studies have shown that vitamins -- especially Omega 3 -- go bad over time. A 2003 study of vitamins on the shelf at a major U.S. retailer showed **78% did not have the amount their label claimed.** In fact, more than half had only 20% or less of the active ingredients!

COUNTER-TOP DISPLAY

- Holds 18 bottles
- Fits nicely in waiting room

Nordic Naturals® are made based on the laws of Norway & are pharmaceutical grade. Nordic Naturals® raw material is harvested from the cleanest waters in the world, & are tested by independent laboratories for heavy metals & over 210 other environmental contaminants. Third party assays are required to confirm freshness as well as levels of PCB, Mercury, & lead. The vitamins are packed in a patented nitrogen environment to retain freshness & reduce oxidation.

The vitamins listed below are not sold at regular discount stores. Best internet price is also GNC price. The average optometrist has 300 dry eye or ARMD patients who would benefit from these. That doctor would realize **\$36,000** profit in sales.

Pro Omega® Lemon flavored to prevent the fish burp common with lesser quality oils.
