

THE FRESNEL PRISM AND LENS CO.

**For those vision care specialists who specialize in
Vision Therapy and Vision Rehabilitation
Vision can be Developed and Changed**

3M Press-On Optics

37 Years of providing a simple, therapeutic and inexpensive way to correct various visual disorders. 3M is the name to trust.

3M™ Press-On™ Optics are the most widely used flexible Fresnel prism on the market.

The thinner membrane makes the 3M™ prism easier to apply and less likely to become dislodged.

Offers accurate diopter measurement and clearer resolution

Fresnel Optic Cleaning Kit

A lint free, micro-fiber cleaning cloth that can reach into the grooves of a Fresnel optic and alcohol free lens cleaner.

It's the cloth that makes the difference.

NEW

I-test™ Phoropter Vision Screener

For bedside consultations or exams away from the office.

Quickly and easily screen vision with the new handheld I-test™.

Tests for myopia, hyperopia, presbyopia and anisometropia.

Place the I-test™ on the face like regular eye glasses, a patient can adjust lens strength by rotating the dial to the desired lens strength. Lens range from +4.00 to -

4.00 diopter in 0.50 diopter increments. Each lens also includes it's own occluder and pin hole occluder
