

Are You In The “O” Zone?

Free Lens Series

- Is digital surfacing accurate to 100th of a diopter
- Available on any lens style
- Includes your favorite anti-reflective coating from Three Rivers Optical

If you're looking for quality lens options for your patients with bifocal needs, step into Three Rivers Optical's "O" Zone. Our "Free" Lens Series offers one-of-a-kind bifocal designs that fill a void in the optical industry. With our unique, patented "Round Seg" technology, your patients will experience the best in bifocal lenses.

TR O Seg – Is a patented lens design created to fill a void in the optical industry. You can now get a lined bifocal in polycarbonate or any resin material in an add range from .50 to 5.00. The softness of the bifocal line is cosmetically pleasing and virtually unnoticeable when worn. The seg size is customizable from 10mm to 45mm.

TR O Blended Seg – Is a lens design created to bridge a gap in the optical industry. For the first time you can now get a blended bifocal in all materials. Add range from .50 to 5.00. The unique blend zone is narrow and easy for patients to adapt to. A great alternative for patients who just can't wear a progressive or do not want a line.

Get in the "O" Zone today. Call Us Today for Your Patient's Bifocal Needs.
